

GRADE LEVEL TRANSITION SUMP

The Aboveground Storage Tank (AST) grade level transition sump is a practical, environmentally sound solution for remote dispensing from aboveground storage tanks. Inside the sump, steel piping easily connects to flexible piping for a tight, continuous run to dispensers or an intermediate sump.

TECHNICAL ADVANTAGES

- Transition sumps help meet environmental regulations by isolating metal piping from the soil.
- Transition sumps can be installed either inside or outside containment dikes.
- 30" burial depth allows the transition sump to be used as the system low point for leak detection.
- Load rated composite cover.
- Flexible entry boot provides a fuel-tight and watertight seal around the metal piping and flexible piping as it enters the sump lid and sidewall.
- H-20 load rating. Pipe entries installed in lids negate the load rating.

ORDERING INFORMATION

Model	Description
AST-2922	AST Grade Level Transition Sump
25202923	Replacement AST-2922 lid, grey
99985553	Replacement gasket
IP-400-B	Inspection port, FEP style with well cap
